Welcome to Beijing and USTB

北京科技大学
University of Science and Technology Beijing

Department of Mineral Resources Engineering
School of Civil and Environmental Engineering

Rationale & motivation

- SDIMIs have been held in the developed regions such as in Europe, Australasia & N America
- but not yet in the developing and emerging economies, though they are facing more issues & problems for sustainable development

Rationale & motivation

- With the most mining professionals & a large share of global mineral supply, China is even more critical to global sustainability from the viewpoint of mineral industries
- It is the right choice for SDIMI 2017 to be held in China/Asia

School of Civil and Environmental Engineering

Objective & themes

- **SDIMI 2017's objective is to explore and manage the dynamics of sustainability**
- **In terms of intergenerational/ temporal and intragenerational/ spatial variability, diversity, equity, and balance**

Objective & themes

- SDIMI 2017 themes may include
- Variability of indicators over time, space or scale
- Capacity and responsibility or accountability for sustainability
- Mineral life cycle stewardship
- Governance and benefits sharing

Objective & themes

- Mining SHE impacts and risks
- Mining education, R&D toward total sustainability
- Leading/best practices for developed or developing, large or small, and private, public or nonprofit entities
- to name a few

Organizers

- With its mining program ranking among the top three and as one of the top 40 universities among 1200 in China
- University of Science & Technology Bejing (USTB) is to be the major organizer for SDIMI 2017

University of Science and Technology Beijing
Department of Mineral Resources Engineering
School of Civil and Environmental Engineering

Organizers

- Interested partners including universities, research institutions and industrial associations will be invited to join us
- Governmental representatives associated with the mineral industries are expected to attend

Dates & Venues

- SDIMI 2017 may be held Monday, June 26 to Thursday, June 29
- Day 1: Registration, plenary and parallel sessions, and reception
- Day 2: Parallel sessions and banquet
- Day 3: Parallel sessions and closing
- Day 4: (Opt) Great Wall or mine tour

Dates & Venues

- The conference venue may be at China National Convention Center/ Olympic Green Convention Center
- together with the main Olympic Games facilities of National Stadium (Bird Nest) & National Aquatics Center (Water Cube)

Dates & Venues

- Or as a less expensive alternative, SDIMI 2017 may be held at
- Xijiao Hotel compounds in the Zhongguancun Science Park area
- where university campuses are resided & various international conferences are held frequently
